

The CO2-MOD Ventilation Kit is a low-cost combination of our CO2-TH CO2, temperature and humidity monitor, modulating damper, 20VA transformer, and actuator. The CO2-TH can be configured to meet the requirements of most applications through the use of an Advanced Installer menu which allows the user to change how the monitor will respond to and report the levels of carbon dioxide, temperature, and humidity. Kit includes CO2-TH monitor, 6", 8" or 10" damper, transformer, and actuator. Additional damper sizes available upon request.

Features and Benefits:

- Clear Indication of Current IAQ Conditions
- Multicolor Back Light - Optional Visual Alarm Warning
- Long Life NDIR CO2 Sensor (10+ Years)
- Clear, Audible Alarm Option
- Assisted Ventilation Function
- Modulating 24V, non-spring return motor for 2 to 10VDC applications
- 20VA transformer

Warranty:

- 5 Years

EQUIPPED WITH
BELIMO
ACTUATORS

Specifications:

Construction	Round: 22-gauge steel shell
Sizes	Round: 6" to 10"
Damper Actuator Type	Modulating 24V, non-spring return motor for 2 to 10VDC applications
Timing	95 seconds
